CRAWFORD COUNTY ROAD DEPARTMENT POLICY ON TILE CROSSINGS

An agreement between landowners on each side of the roadway must be secured before we permit a crossing. The county Engineer's Office shall determine the necessity of crossing the road for a suitable outlet by letter from the NRCS stating such. On gravel or earth roads the tile may continue through the road. Backfill/surfacing will be as directed by the County Engineer. The landowners will be subject to costs associated with settlement, blading and surfacing the crossing at a later date as deemed appropriate. Boring will be required under paved roads, and deep crossings under gravel roads.

All requests for tile crossings should be submitted two weeks before construction. The contractor's estimated cost will be reviewed before the permit can be granted. Crawford County will participate in a costs share arrangement for the tile crossings up to the following amount, plus the cost of the corrugated metal pipe furnished by the County through the road section:

Dirt Road - \$350.00
Gravel and/or Oil Road - \$500.00
Paved Road - \$750.00

Any work started before receiving written permission will not be considered for payment.

All necessary and proper barricades, flares, etc., as per the Manual on Uniform Traffic Control Devices, shall be furnished by and maintained by the applicant. Maximum safety precautions shall be maintained at all times to protect workers, property owners and the traveling public from accidents due to the operations of the applicant.

Crawford County shall be indemnified and saved harmless of any damages resulting from the applicant's operations.

Cost share payment will be made to the applicant, owner or operator upon receipt of a signed claim form and the applicant's bill (or copy) from the contractor.
